

## psql commands

Document author: anna.hammais@tyks.fi

### List psql commands

```
psql=> \?
```

See also <http://postgresguide.com/utilities/psql.html> for a brief introduction.

### Show databases

```
psql=> \l+                -- shows databases and their space usage
psql=> \c[onnect] <database_name> -- connects to specific database
psql=> \conninfo           -- shows which database you are currently connected to, and as
                           which user
```
