Login as specific user

Document author: anna.hammais@tyks.fi, arho.virkki@tyks.fi

First ssh to ktppg.vsshp.net, then issue

```
psql -U <username> [--password]
```

Login as superuser

```
sudo su - postgres
psql
```

Automated login inside scripts

```
PGPASSWORD=<passwd here> psql -U <usernamer> -h <host> -d <database>
```

For example, list all schemas in ktp database to standard output, then quit

```
echo "\dn" | PGPASSWORD=<passwd here> psql -U ktp -h gradient
```
